Mr Xavier Prevost
African Energy Review
Pretoria

21 March 2010

Dear Mr Prevost (Xavier),

**APPRECIATION FOR LECTURING ON POSTGRADUATE COURSE:
COAL SCHOOL 2: ECONOMIC GEOLOGY OF SOUTH AFRICAN COAL**

Once again I write to you with the utmost appreciation for the significant contribution you made to the above course! It may seem like a recurring record, but once again I need to impress upon you the enormous gratitude that the attendees and I felt for the sharing of your knowledge and experience so eloquently and so generously to them. The evaluations done by the whole class were unanimous in their high level of marking of your style, method of presentation and content.

This year the course was run again with large classes (between 35 and 42 each day) and still they keep coming back for more. It has been most rewarding to see that Anglo Coal, Sasol, BHP Billiton, Xstrata, Arcelor/Mittal, Exxaro, small and medium scale mining and beneficiation personnel, Eskom power station personnel and SA, Botswanan and Mocambiquan government people attending. This is attributable to both the need in industry for this type of information and to the high level of teaching and nature of information dispersal that is being given out on these courses - and for these reasons I thank you once again for your personal contribution! We could not run these courses without you!

In conclusion, may I just ask for a 20 point question for the forthcoming course examination – with a few bullet points of what you would expect the answer to contain?

With sincere thanks once again and best wishes
Best wishes
Rosemary
